Colorado Time Systems introduces a completely wireless scoring and display system for Synchronized Swimming. *Wireless Synchro* conforms to the latest USA Synchro and FINA regulations.

A complete system includes: Wireless Judging Terminals, Wireless Interface, and Wireless Synchro software. The software collects judges scores from the Wireless Judging Terminals, and performs the appropriate calculations for both single and multi-component scores for both Free and Technical Routines.

Judges' scores can also be manually entered directly to the PC through the Wireless Synchro software.

Calculated scores can be displayed on any CTS scoreboard via Sky-Fi Wireless Scoreboard Adapter or direct cable connection.

Software requires Microsoft .Net Framework 3.5 SPI (Windows XP Service Pack 2 or greater; Windows Vista or Windows 7).

Part Numbers:

R-8700-0159: Wireless Synchro PC Software

SYNCHRO-01*: Complete Wireless Synchro Package
