Colorado Time Systems Introduces Wireless Judging Terminals for Diving

Colorado Time Systems is pleased to announce the release and production of Wireless Judging Terminals (WJTs) for diving. The WJTs remove all cabling from the deck and remove possible trip hazards.

The system has four wireless channels, which are distinct from each other; allowing multiple events to be run in the same vicinity or facility.

The design features include:

- Backlighting and contrast on the 4-line LCD display can be adjusted to individual judge's preference and facility conditions
- Contoured hand grip
- Splash proof and waterproof
- Easy to enter scores
- One button press to view remaining battery life

Based in Loveland, Colorado, Colorado Time Systems has established a reputation for precision and innovation in swim timing equipment. Since 1972, premier aquatic facilities have chosen Colorado Time Systems for platinum quality timing, scoring, and display systems. Colorado Time Systems is the Official Timing and Scoring Partner of USA Diving.
