

NOTICE REGARDING THE USE OF THIRD-PARTY PRODUCTS

It has recently come to our attention that third-party manufacturers of aquatic hardware products are touting compatibility with Colorado Time Systems products. This information concerns us since this is not necessarily the case. By using third-party hardware products, the integrity of your system could be at risk.

We concentrate on complete quality and accuracy in timing, scoring and display systems. If a Colorado system is compromised with third-party hardware additions, we cannot assure that you will receive the same quality and accuracy.

Colorado Time Systems has not conducted any tests with a third-party hardware product included in our system. Therefore, we cannot state with any certainty that third-party hardware products are compatible with our systems.

Our goal is to provide excellence in a meet, and it would be disappointing for everyone if third-party hardware were to jeopardize the integrity of the end result.

Please feel free to contact our office if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Stynes", is written over a light blue rectangular background.

President & CEO
