Spring Clean your Colorado Time Systems Equipment

Join us over the next 4 weeks as we take a deeper dive into cleaning and maintaining your CTS scoring and timing equipment by breaking down Spring Cleaning into 4 Easy to Follow Steps.

Inspect your Equipment

01

Whether you are putting your equipment away or pulling it out for the summer, test to make sure everything is working properly.

02

Clean your Equipment

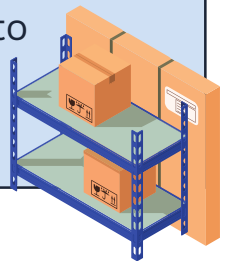

Thoroughly cleaning each piece of your equipment, including connections, to keep it in top operating order.

Store your Equipment

03

Storing your equipment away for the season, or storing your equipment on the pool deck, there is a proper way to keep your investments safe.

04

Service your Equipment

Your equipment will need to be routinely serviced to ensure proper function and performance.

Our products are designed to withstand harsh environments, perform with accuracy and maximize the longevity of your investment. Proper regular care and maintenance will prolong the life of your investment and keep your scoring and timing equipment operating as new.
